Students name Task	Su Lei	Yang Qianqian	Zhang Hanwen
Front-End Development			
User Management		✓	
Internship Management	✓		
Internship Result Entry and Mark Calculation	✓		
Result Viewing			✓
Kinetic Radar Engine	✓		
Official Transcript Generator	✓		
Monochromatic Donut Chart	✓		
Back-End Development			
User Management		✓	
Internship Management	✓		
Internship Result Entry and Mark Calculation	✓		
Result Viewing			✓
Real-time Score Validation & Security Logic	✓		
Dynamic Data Aggregation API	✓		
Asynchronous CSV Bulk Data Importer	✓		
Signature:	Sulei	Yang Qianqian	Haiwen

Individual Contribution Details

Yang Qianqian

She was responsible for the initial front-end setup of the User Management and Internship Management modules. Her work mainly focused on drafting basic HTML structures and simple CSS for these two specific pages.

- **GitHub Branch:** <https://github.com/Soleil-8255/DBI-group6/tree/YangQianQian>

Zhang Hanwen

He created the initial draft of the ER diagram for the database. He also worked on the early-stage backend development, specifically writing basic PHP scripts to fetch data for the Assessor module.

- **GitHub Branch:** <https://github.com/Soleil-8255/DBI-group6/tree/feature-haiwen>

Su Lei

1. Technical Development

- **Database Normalization:** Upgraded the initial database draft to 3NF standards and enforced referential integrity.
- **Advanced SQL Development:** Wrote all complex queries using SQL JOINS for cross-table data aggregation.
- **Core Backend Logic:** Developed the mark calculation engine and PHP/PDO security layer.
- **Frontend Refinement:** Re-designed and implemented the responsive UI using custom CSS and Vanilla JavaScript.
- **Extra Module Development:** designed and coded the "Student Role" extension.

2. Project Management & Docs

- **GitHub Maintenance:** Managed the main repository, handled code merging, and organized branch structures.
- **ERD Finalization:** Drew the final Entity-Relationship Diagram using standard Crow's Foot notation.
- **WBS Documentation:** Detailed the project breakdown and verified individual member contributions.
- **AI Usage Log:** Prepared the required transparency report regarding generative AI assistance.

3. Final Delivery

- **Video Production:** Scripted, recorded, and edited the 5-minute system demonstration video.
- **Bug Fixing & Testing:** Conducted final integration testing and resolved cross-browser compatibility issues.
- **Final Packaging:** Organized the file structure and created the final submission ZIP for Moodle.
- **GitHub Main Branch:** <https://github.com/Soleil-8255/DBI-group6/tree/sulei>
